- Testing, tools & hardware: Software testing, test cases, Selenium, Cucumber, Postman, GitHub, Android Studio and Raspberry Pi.

Game Projects	Selected game, VR, WebGL, 3D and portfolio projects with compact live and code links.
Komet Quest / Agentic Browser Simulator	▪ Unity WebGL game developed for my bachelor's dissertation, simulating AI agentic browsers through guided levels, practical tasks, feedback, progression and analytics. ▪ Focuses on user learning, trust, responsible use, AI limitations and risk awareness around emerging AI tools. ▪ Tech: Unity, C#, WebGL and Firebase. ▪ Links: Live Code
Personal Portfolio	▪ Portfolio website deployed on Vercel with project filtering, detail pages, contact form and a responsive UI layout. ▪ Tech: TypeScript, CSS, HTML, Vercel, Storybook and Vitest. ▪ Links: Live Code
VR Escape Room	▪ Unity VR escape room with sci-fi puzzle rooms, object grabbing, keycards, pressure plates, keypad interactions and scene progression. ▪ Tech: Unity, C#, XR Interaction Toolkit and OpenXR. ▪ Links: Live Code
VR Farm Simulator	▪ Unity VR farming simulator exploring crop planting, harvesting, tractor controls, object interaction and animal feedback. ▪ Tech: Unity, C#, XR Interaction Toolkit and XR Hands. ▪ Links: Live Code
Blender Park	▪ Detailed Blender urban park scene with a cafeteria/bar, bridges, benches, trees, lamp posts, a skate park, moving cars, animated characters, custom textures and sunset environment. ▪ Added generated grass/turf, interior and exterior lighting with shadows, Nishita Sky daylight/sunset setup, animated sun elevation, curve paths and multiple camera views. ▪ Tech: Blender, 3D modelling, animation, lighting, custom textures and camera systems. ▪ Links: Live Code
WebGL Virtual Pet	▪ Browser-based 3D virtual pet where players feed, play with, customise and progress a pet with persistent cloud saves. ▪ Tech: React, Vite, Three.js, React Three Fiber and Firebase. ▪ Links: Live Code
BubbleBound - Global Game Jam Malta 2025	▪ Team game jam project where Mr. Fisher survives an underground sewer by absorbing floating bubbles; worked on level design and most gameplay mechanics. ▪ The team placed 3rd in Global Game Jam Malta 2025. Tech: Unity and C#. ▪ Links: Live Code
Helix Outriders Game Website	▪ Promotional landing website for the Helix Outriders game concept, showing the game's style and key information in responsive sections. ▪ Tech: React, TypeScript, CSS, HTML and Vercel. ▪ Links: Live Code
Tetris Flip	▪ Retro Jam MCAST 2025 team game: a 2.5D twist on classic Tetris with depth and dual-side play. ▪ Worked as one of the main programmers and game designers; the team received an honourable nomination. ▪ Tech: Unity and C#. ▪ Links: Live Code
Unity Turn-Based Combat Game	▪ Turn-based combat prototype made using Unity, C# and object-oriented programming principles. ▪ Game loop lets the player and enemy choose between healing, dealing damage or using a shield.
